HSE Compliant Excel Kits

Refill Kits Available On Page 5

Health & Safety Executive First Aid at Work Legislation

The Health and Safety Approved code of Practice First Aid Kit was revised in January 1997 and became effective in March 1997.

Core Medical's kits and contents are designed to meet the recommended guidelines of the HSE First Aid Kit at Work Code of Practice.

It should be noted that the contents of First Aid containers should be examined frequently and restocked as soon as possible after use.

Sufficient supplies should be held in a back-up stock on-site. Care should be taken to discard items safely after the expiry date has passed.
